EXPERIENCE

JUL 2024 - CURRENT
Software Engineer [TabTabGo] *Company*

As a Software Engineer at TabTabGo, I develop user-facing features using ReactJS, React Native, TypeScript, and ASP.NET. My role involves creating reusable components, optimizing performance, and translating designs into smooth, responsive UIs across various devices. I also collaborate with the team to deliver scalable, high-quality web applications for sectors like hospitality, healthcare, and retail. Contributed to setting up CI/CD pipelines using Azure DevOps and Docker to automate build and deployment processes.

CO-Founder: nadeem@tabtabgo.com

JUL 2023 – NOV 2023
Front End Developer [Fitnet] *Company*

During my time as a Front-End Developer at Fitnet, I contributed to key web development projects, enhancing user experience and implementing customized features for specific user groups. My work was recognized for its quality and impact, as highlighted in a recommendation letter and other deliverables.

CO-Founder: hasan.asfahani@fitnetapp.com
[Letter of Recommendation]

NOV 2023 – JUNE 2024
Full-Stack Developer [Aga Khan Foundation - Syria]

As a contracted Full-Stack Developer with the Aga Khan Foundation, I contributed to the improvement of internal systems, including collaborating on the development of a database query builder. For additional information, references are available upon request.

IT Team Lead: hayan.khawla@akdn.org
